

SAFETY SERVICES

1. H2S Monitoring/Bump Test:

This service checks for the presence of hazardous gases, including hydrogen sulfide (H2S), and provides regular tests to ensure the safe operation of H2S monitors.

2. Monthly Safety Meetings (In-person or Online):

Team meetings are conducted to review performance, goals, and any safety-related issues. This meeting can be conducted in person or virtually.

3. Safety Compliance Services:

Inspections and assessments to ensure that safety regulations are being met.

4. Facility Safety Compliance:

An inspection and assessment to ensure compliance with government safety standards and protocols is conducted.

5. Safety Program Consultation:

Experts review your safety policies, processes, and procedures to ensure compliance and identify potential issues.

6. Company Safety Manual/Policies/Procedures:

This service provides companies with a comprehensive safety manual with relevant safety policies and procedures. It is designed to reduce workplace accidents and hazards, resulting in safer work environments for employees.

7. Contractor Safety Orientation:

A brief presentation about safety protocol for contractors working on your site.

8. Safety Forms:

Digital forms to record safety information regarding incidents, inspections, and employees.

9. Training Tracker:

A software application that provides an overview of safety training and compliance activities.

10. ISNet/PEC Database:

A database of safety profiles and ratings for contractors is provided to ensure safe operations on-site.

11. OSHA Log/Record Keeping:

Documentation of safety incidents and standards is maintained in a secure digital database.

12. DOT Services/Compliance:

A team reviews and ensures compliance with all Department of Transportation regulations.

SAFETY TRAINING

1. CPR/First Aid:

Our CPR/First Aid training provides knowledge and practical skills to allow you to provide immediate medical attention for victims of sudden illnesses and injuries.

2. PEC/H2S/H2S Clear:

Our PEC/H2S/H2S Clear training equips participants with essential life-saving skills to safely work in hazardous hydrogen sulfide (H2S) gas atmospheres.

3. DOT Services/Compliance:

We offer a comprehensive range of DOT Services/Compliance training to ensure your business complies with federal trucking regulations and best practices.

4. Frontline Safety Leadership:

Equip your Frontline safety leaders with industry-leading training. Frontline Safety Leadership is an 8-hour training course designed to help new and existing field supervisors, foremen, and superintendents understand their worksite responsibilities regarding workers' health and safety.

5. Safe Driver Training:

Safe Driver by Veriforce is not just a course; it's a commitment to transform driving behaviors and ensure the safety of workers in one of the most hazardous industries. By equipping trainers with cutting-edge knowledge and tools, we aim to significantly reduce the distressing record of SIF incidents.
